# Block area for Maintenance Area Control

- Ai Atom Area Control System can block an area on the Fleet Map in situations where machines are opened for Maintenance (Planned or Unplanned) and there is no room for the robots to travel.
- When the robot is going to the decision point – with a simple if, else you can direct the robot to an alternative route.

# Block area for Maintenance Area Control

- The input data can be from a SMART RGB Button, Presence Sensor, I/O box connected to the machine, a dashboard, a PLC, etc.
