

Easy Access Dashboards

ai automation[®]

Taking the initiative

A custom dashboard that is acting as an ordering system for the warehouse or sub-assemblies where the operator is requesting parts.

aiatom.ro

Easy Access Dashboards

- The ordering system can be with x amount per quantity or single units.
- This is preferred in locations where there is no good ordering system or was not needed up to integration with Robots.
- The same system can be adapted for any kind of parts (spare parts, raw materials, packaging, consumables, pallets, boxes, whatever is needed to be moved from one location to another).

Easy Access Dashboards

- This has two sides:
 - One from the perspective of the one who needs the goods (receiver).
 - One from the perspective of the one who needs to send the goods (sender).

Easy Access Dashboards

- The dashboard can be used also for single parts or quick missions (one simple push on the screen).
